SUBJECT INDEX TO VOLUME 49

Air Supply Opening Model of Ceiling Diffusers for Numerical Simulation of Indoor Air Distribution under Actual Connected Conditions, Part II: Application of the Model, 821

Analysis of Simplifying Assumptions for the Numerical Modeling of the Heat and Mass Transfer in a Porous Desiccant Medium, 851

Analysis of Solidification of a Semitransparent Planar Layer Using the Lattice Boltzmann Method and the Discrete Transfer Method, 279

Benefits Derivable from Connecting the Bottom and Top Walls of Attic Enclosures with Insulated Vertical Side Walls, 175

Combined Analytic and Numerical Method for Predicting Solid Layer Growth in a Static Melt Crystallizer, A 831

Conjugate Heat Transfer of a Disk-Shaped Miniature Heat Pipe, 25

Convective Transport Processes in Data Centers, 923

Coupled Heat and Moisture Transport in Concrete at Elevated Temperatures—Effects of Capillary Pressure and Adsorbed Water, 733

Design of Thermal Initial and Boundary Conditions to Control the Expansion of Water-Based Phase-Change Materials in Low Gravity, 525

Differential Quadrature Element Method for Nonlinear Transient Heat Transfer Analysis of Extended Surfaces, A 511

Discontinuous Galerkin Spectral Element Simulation of a Thermal-Hydraulic Problem in Superconducting Magnets, 109

Effects of Reynolds and Prandtl Numbers on Heat Transfer Across a Square Cylinder in the Steady Flow Regime, 717

Enhancement of Heat Transfer from Block Heat Sources Mounted on a Short Board to Air Stream in a Channel by Constructing Slots in the Board, 495

Flow and Heat Transfer in a Parallel-Plate Channel with Porous and Solid Baffles, 471

Formulation and Numerical Methodology for Three-Dimensional Wake of Heated Circular Cylinder, 129

Heat Transfer Conditions in Flow Across a Bundle of Cylindrical and Ellipsoidal Tubes, 699

Investigation of Feasibility of Developing Intelligent Firefighter-Protective Garments Based on the Utilization of a Water-Injection System, 427

Laser Short-Pulse Heating of Gold–Silver Assembly: Entropy Generation Due to Heat and Electricity Flows in Electron Subsystem, 873

Mesoscale Analysis of Thermal Flow of Magnetic Fluids, 1009

Modeling the Flows of Two Immiscible Fluids in a Three-Dimensional Square Channel Using the Level-Set Method, 893
Multiplicity of Solutions Induced by Thermosolutal Convection in a Square Porous Cavity Heated from Below and Submitted to Horizontal Concentration Gradient in the Presence of Soret Effect, 69

Natural Convection in a Rectangular Cavity Heated from Below and Uniformly Cooled from the Top and Both Sides, 301
Natural Convection in a Square Cavity with Spatial Side-Wall Temperature Variation, 683
Natural Convection in a Vertical Rectangular Cavity Filled with a Non-Newtonian Power Law Fluid and Subjected to a Horizontal Temperature Gradient, 969
Natural Convection in an Enclosure with Distributed Heat Sources, 655
Nonequilibrium Finite-Volume Model for Conjugate Fluid/Porous/Solid Domains, A 543
Numerical Analysis for Dual-Phase-Lag Heat Conduction in Layered Films, 589
Numerical Analysis of EDL Effect on Heat Transfer Characteristic of 3-D Developing Flow in a Microchannel, 991
Numerical Analysis of Radiative Effects on Natural Convection in Vertical Convergent and Symmetrically Heated Channels, 369
Numerical Investigation of Laminar Forced Convection and Entropy Generation in a Helical Coil with Constant Wall Heat Flux, 257
Numerical Investigation of Thermal Contact Resistance between the Mold and Substrate on Laser-Assisted Imprinting Fabrication, 669
Numerical Investigation of Turbulent Heat Transfer in a Rectangular-Sectioned 90° Bend, 323
Numerical Method for Obtaining an Optimal Temperature Distribution in a 3-D Triple-Layered Cylindrical Skin Structure Embedded with a Blood Vessel, A 765
Numerical Modeling of Cross-Flow Plate-Fin Air-to-Air Heat Exchanger Under Unsteady Flow Conditions, 1
Numerical Predictions of Stanton Numbers, Skin Friction Coefficients, Aerodynamic Losses, and Reynolds Analogy Behavior for a Transsonic Turbine Vane, 237
Numerical Simulation of Electrokinetic Flow and Heat Transfer in Microchannels with a Finite-Volume Method, 451
Numerical Simulation of Laser-Produced Plasma Devices for EUV Lithography Using the Heights Integrated Model, 215
Numerical Simulation of Steady-State Conjugate Heat Transfer in a Circular Microtube Inside a Rectangular Substrate, 635
Numerical Simulation of Temperature Field in Solar Arrays of Spacecraft in Low Earth Orbit, 803
Numerical Simulation of Two-Dimensional Bubbles Initially Flattened Along a Flat Plate, 393
Numerical Study of Laminar and Turbulent Flow Through a Pipe with Fins Attached, 195
Numerical Study of the Effects of Large Blood Vessels on Three-Dimensional Tissue Temperature Profiles During Cryosurgery, 47
Numerical Thermal Analysis to Study the Effect of Static Contact Angle

on the Cooling Rate of a Molten Metal Droplet, 95

Optimal Design of a Parallel-Flow Heat Exchanger Using a Response Surface Methodology, 411

Parallel Simulation Study of a Laser Surface Alloying Process, 905
Polymer Melt Flow in Plane Channels: Effects of the Viscous Dissipation and Axial Heat Conduction, 159

Radiative and Conductive Heat Exchanges in High-Temperature Glass Melt with the Finite-Volume Method Approach. Influence of Several Spatial Differencing Schemes on RTE Solution, 567
Ray-Tracing/Nodal-Analyzing Model for Transient Thermal Behavior of a Scattering Medium with a Variable Refractive Index, 607
Resistance Spot Welding Process: Experimental and Numerical Modeling of the Weld Growth Mechanisms with Consideration of Contact Conditions, 345

Temperature in a Rotating Ring Subject to Frictional Heating from Two Stationary Pins, 785
Three-Dimensional Modeling of Thermohydrodynamic Lubrication in Slider Bearings Using Streamline Upwind Petrov-Galerkin Method, 947

CONTENTS TO VOLUME 49

CONTENTS Vol. 49, No. 1

1 Numerical Modeling of Cross-Flow Plate-Fin Air-to-Air Heat Exchanger Under Unsteady Flow Conditions **K. Nakonieczny**

25 Conjugate Heat Transfer of a Disk-Shaped Miniature Heat Pipe **Ya-Wei Lee, Chih-Wei Chang, Jr-Ming Miao, and Ping-Hei Chen**

47 Numerical Study of the Effects of Large Blood Vessels on Three-Dimensional Tissue Temperature Profiles During Cryosurgery **Zhong-Shan Deng and Jing Liu**

69 Multiplicity of Solutions Induced by Thermosolutal Convection in a Square Porous Cavity Heated from Below and Submitted to Horizontal Concentration Gradient in the Presence of Soret Effect **A. Mansour, A. Amahmid, M. Hasnaoui, and M. Bourich**

95 Numerical Thermal Analysis to Study the Effect of Static Contact Angle on the Cooling Rate of a Molten Metal Droplet **M. P. Mughal, H. Fawad, and R. Mufti**

CONTENTS Vol. 49, No. 2

109 Discontinuous Galerkin Spectral Element Simulation of a Thermal-Hydraulic Problem in Superconducting Magnets **Shaolin Mao, Cesar A. Luongo, and David A. Kopriva**

129 Formulation and Numerical Methodology for Three-Dimensional Wake of Heated Circular Cylinder **Katsuhisa Noto and Kyohsuke Fujimoto**

159 Polymer Melt Flow in Plane Channels: Effects of the Viscous Dissipation and Axial Heat Conduction **P. S. B. Zdanski and M. Vaz, Jr.**

175 Benefits Derivable from Connecting the Bottom and Top Walls of Attic Enclosures with Insulated Vertical Side Walls **El Hassan Ridouane, Antonio Campo, and Mohammed Hasnaoui**

195 Numerical Study of Laminar and Turbulent Flow Through a Pipe with Fins Attached **Nuri Yucel and Nureddin Dinler**

CONTENTS Vol. 49, No. 3

215 Numerical Simulation of Laser-Produced Plasma Devices for EUV Lithography Using the Heights Integrated Model **V. Sizyuk, A. Hassanein, V. Morozov, V. Tolkach, T. Sizyuk, and B. Rice**

237 Numerical Predictions of Stanton Numbers, Skin Friction Coefficients, Aerodynamic Losses, and Reynolds Analogy Behavior for a Transsonic Turbine Vane **Q. Zhang and P. M. Ligrani**

257 Numerical Investigation of Laminar Forced Convection and Entropy Generation in a Helical Coil with Constant Wall Heat Flux **T. H. Ko**

279 Analysis of Solidification of a Semitransparent Planar Layer Using the Lattice Boltzmann Method and the Discrete Transfer Method **Rishi Raj, Amit Prasad, Pritish Ranjan Parida, and Subhash C. Mishra**

301 Natural Convection in a Rectangular Cavity Heated from Below and Uniformly Cooled from the Top and Both Sides **Amaresh Dalal and Manab Kumar Das**

CONTENTS Vol. 49, No. 4

323 Numerical Investigation of Turbulent Heat Transfer in a Rectangular-Sectioned 90° Bend **S. Etemad and B. Sundén**

345 Resistance Spot Welding Process: Experimental and Numerical Modeling of the Weld Growth Mechanisms with Consideration of Contact Conditions **E. Feulvarch, P. Rogeon, P. Carré, V. Robin, G. Sibilia, and J. M. Bergheau**

369 Numerical Analysis of Radiative Effects on Natural Convection in Vertical Convergent and Symmetrically Heated Channels **Nicola Bianco, Luigi Langellotto, Oronzio Manca, and Vincenzo Naso**

393 Numerical Simulation of Two-Dimensional Bubbles Initially Flattened Along a Flat Plate **Tomio Okawa, Isao Kataoka, and Michitsugu Mori**

411 Optimal Design of a Parallel-Flow Heat Exchanger Using a Response Surface Methodology **Seok-Jin Oh, Kwan-Soo Lee, and Seung-Jae Moon**

CONTENTS Vol. 49, No. 5

427 Investigation of Feasibility of Developing Intelligent Firefighter-Protective Garments Based on the Utilization of a Water-Injection System **P. Chitrphiromsri, A. V. Kuznetsov, G. Song, and R. L. Barker**

451 Numerical Simulation of Electrokinetic Flow and Heat Transfer in Microchannels with a Finite-Volume Method **P. S. Glockner and G. F. Naterer**

471 Flow and Heat Transfer in a Parallel-Plate Channel with Porous and Solid Baffles **Nicolau B. Santos and Marcelo J. S. de Lemos**

495 Enhancement of Heat Transfer from Block Heat Sources Mounted on a Short Board to Air Stream in a Channel by Constructing Slots in the Board **Yeong-Ley Tsay and Jen-Chieh Cheng**

511 A Differential Quadrature Element Method for Nonlinear Transient Heat Transfer Analysis of Extended Surfaces **P. Malekzadeh, H. Rahideh, and G. Karami**

CONTENTS Vol. 49, No. 6

525 Design of Thermal Initial and Boundary Conditions to Control the Expansion of Water-Based Phase-Change Materials in Low Gravity **James M. Blackwood and Francis C. Wessling**

543 A Nonequilibrium Finite-Volume Model for Conjugate Fluid/Porous/Solid Domains **Lee Betchen, Anthony G. Straatman, and Brian E. Thompson**

567 Radiative and Conductive Heat Exchanges in High-Temperature Glass Melt with the Finite-Volume Method Approach. Influence of Several Spatial Differencing Schemes on RTE Solution **Nacer Berour, David Lacroix, and Gérard Jeandel**

589 Numerical Analysis for Dual-Phase-Lag Heat Conduction in Layered Films **Kuo-Chi Liu and Po-Jen Cheng**

607 Ray-Tracing/Nodal-Analyzing Model for Transient Thermal Behavior of a Scattering Medium with a Variable Refractive Index **Hong-Liang Yi, He-Ping Tan, Hao-Chun Zhang, and Jian-Feng Luo**

CONTENTS Vol. 49, No. 7

635 Numerical Simulation of Steady-State Conjugate Heat Transfer in a Circular Microtube inside a Rectangular Substrate **P. Sharath, C. Rao, Muhammad M. Rahman, and Hassan M. Soliman**

655 Natural Convection in an Enclosure with Distributed Heat Sources **A. Bazylak, N. Djilali, and D. Sinton**

669 Numerical Investigation of Thermal Contact Resistance between the Mold and Substrate on Laser-Assisted Imprinting Fabrication **Fei-Bin Hsiao, Di-Bao Wang, and Chun-Ping Jen**

683 Natural Convection in a Square Cavity with Spatial Side-Wall Temperature Variation **Nawaf H. Saeid and Yusli Yaacob**

699 Heat Transfer Conditions in Flow Across a Bundle of Cylindrical and Ellipsoidal Tubes **Andrej Horvat and Borut Mavko**

717 Effects of Reynolds and Prandtl Numbers on Heat Transfer Across a Square Cylinder in the Steady Flow Regime **A. K. Dhiman, R. P. Chhabra, A. Sharma, and V. Eswaran**

CONTENTS Vol. 49, No. 8

733 Coupled Heat and Moisture Transport in Concrete at Elevated Temperatures—Effects of Capillary Pressure and Adsorbed Water **Colin T. Davie, Chris J. Pearce, and Nenad Bićanić**

765 A Numerical Method for Obtaining an Optimal Temperature Distribution in a 3-D Triple-Layered Cylindrical Skin Structure Embedded with a Blood Vessel **Le Zhang, Weizhong Dai, and Raja Nassar**

785 Temperature in a Rotating Ring Subject to Frictional Heating from Two Stationary Pins **A. Yevtushenko and J. Tolstoj-Sienkiewicz**

803 Numerical Simulation of Temperature Field in Solar Arrays of Spacecraft in Low Earth Orbit **Peng Li, Hui-er Cheng, and Wen-bo Qin**

821 Air Supply Opening Model of Ceiling Diffusers for Numerical Simulation of Indoor Air Distribution under Actual Connected Conditions, Part II: Application of the Model **Xianting Li, Bin Zhao, Ping Guan, and Hongze Ren**

CONTENTS Vol. 49, No. 9

831 A Combined Analytic and Numerical Method for Predicting Solid Layer Growth in a Static Melt Crystallizer **Zongwen Feng, Weizhong Dai, Raja Nassar, and James Palmer**

851 Analysis of Simplifying Assumptions for the Numerical Modeling of the Heat and Mass Transfer in a Porous Desiccant Medium **C. R. Ruivo, J. J. Costa, and A. R. Figueiredo**

873 Laser Short-Pulse Heating of Gold–Silver Assembly: Entropy Generation Due to Heat and Electricity Flows in Electron Subsystem **Bekir Sami Yilbas**

893 Modeling the Flows of Two Immiscible Fluids in a Three-Dimensional Square Channel Using the Level-Set Method **Y. F. Yap, J. C. Chai, K. C. Toh, and T. N. Wong**

905 Parallel Simulation Study of a Laser Surface Alloying Process **Dipankar Chatterjee, Supriya Sarkar, and Suman Chakraborty**

CONTENTS Vol. 49, No. 10

923 Convective Transport Processes in Data Centers **Jeffrey Rambo and Yogendra Joshi**

947 Three-Dimensional Modeling of Thermohydrodynamic Lubrication in Slider Bearings Using Streamline Upwind Petrov-Galerkin Method **Miles Zengeya, Mohamed Gadala, and Guus Segal**

969 Natural Convection in a Vertical Rectangular Cavity Filled with a Non-Newtonian Power Law Fluid and Subjected to a Horizontal Temperature Gradient **M. Lamsaadi, M. Naïmi, M. Hasnaoui, and M. Mamou**

991 Numerical Analysis of EDL Effect on Heat Transfer Characteristic of 3-D Developing Flow in a Microchannel **S. T. Tan and E. Y. K. Ng**

1009 Mesoscale Analysis of Thermal Flow of Magnetic Fluids **Yimin Xuan, Qiang Li, and Zhengdong Yang**
